Skills

Javascript (ES6)

Angular 8

Angular JS

Typescript

HTML/HTML5, CSS

NgRX

Data Structures and Algorithms

API Integrations

Tools

Git, Github

Chrome dev tools

Redux dev tools

Visual Studio code

Other skills/ Interests

UI/UX Designing

Graphic designing

Experience

Gainsight - 1 year +

Software Development Engineer - (April 2021 - Present)

Key Responsibilities – Building responsive design for a large customer base, working through complex UI issues with Angular and Typescript, optimising application performance, writing unit tests, mentoring juniors.

1. Complete UI development and design for data archival feature - Detecting when data exceeds the permissible limit, archiving data beyond certain time limit set by the user, integrating APIs related to it.

2. UI revamp used for creating projects for data analysis. Result - Made the process of project creation much simpler and easy to understand, and navigate through the complex process faster. Along with improving the look and feel of the web app, optimised the performance for faster load/rendering of the app.

Kony(Part of Temenos) - 2 Years

Software Development Engineer - (April 2019 - April 2021)

Key Responsibilities – Implementation of features, fixing customer bugs, unit testing, mentoring juniors, design discussions with product managers

Worked in the SPA/desktopweb team on the tool Visualiser

1. Search Feature – Implementation of search/filter functionality to search through huge amount data using keywords and conditional queries, got awarded(extra mile award) for this feature.

Result - Huge amount of data could be searched in lesser amount of time and increase in load speed

2. Implemented lazy load(load data as the user scrolls) on the segment widget used for displaying huge amount of data, without any delay

3. Developed the UI for the tool Kony COP , used for improving the load speed

and performance of large web apps built on Visualizer. Result - Reduced the time spent by other developers on improving the performance

IserveU (Internship) — Web Developer / UI developer (May 2017 - July 2017)

Technologies used - Material Design, Ionic, Bootstrap, Angular JS

Complete UI design of the mobile app, fetching and manipulating data through rest API to facilitate user payments and bank transfers, and miscellaneous activities like phone recharge, bill payments

Education

B-Tech (2015-2019)	Class XII (2015)	Class X (2013)
KIIT University - CGPA- 8.4	Delhi Public School - Aggregate - 92	Delhi Public School - Aggregate - 96

Achievements

2021 – Spotlight Award by Gainsight, for delivering data archival feature singlehandedly, unit testing, co-ordinating with the project managers and giving a successful release.

2019 – Extra Mile Award by Temenos, for delivering complex features independently, unit testing,
